

Pilot Tests

Several remediation techniques can be applied in areas in rehabilitation. The pilot trials offered by EBP Brazil are of great relevance for the confirmation of the measure and for the adequate sizing of the intervention applicability.

EBP Brazil has equipment and pilot plants in order to offer complete support to customers in this crucial stage of the areas rehabilitation process.

EBP Brazil offers the following pilot tests, for water, soil and vapors:

- Air Sparging
- Biodegradation
- Biostimulation
- Thermal Desorption
- Electro kinetics
- Extraction of Vapours
- Chemical Oxidation
- Ozone
- Permeability
- Chemical Reduction
- Free Phase Transmissivity
- Ultra-Violet (UV)
- Specific tests
